1. Improved lines with enhanced yield in chickpea

Improved lines showed 24% higher yield under irrigated condition

2. Improved lines with disease resistance in chickpea

3. Improved lines for foliar disease (rust and late leaf spot) resistance in groundnut

4. Improved lines for high oleic acid in groundnut

5. Efficient hybrid breeding in pigeonpea

6. Improved lines for downy mildew resistance (DMR) in pearl millet

7. Improved lines for high grain Fe & Zn density and DMR in pearl millet

8. Improved lines for blast resistance in pearl millet

9. Improved lines for striga resistance in sorghum

10. Improved lines for drought tolerance in sorghum

11. Improved lines for Shoot fly resistance in sorghum
